## Utility Technician Position

### Description

This is a skilled technical position in constructing, operating, and maintaining natural gas distribution, electrical overhead and underground and communication distribution systems. Other interdepartmental duties include meter reading, electrical generation operations and working with the public works/city crews.

### Qualifications

Requirements include: on-call rotation, high school diploma, valid CDL, pre-employment drug screening.

Candidates should have hands on electrical experience, including by not limited to working with overhead and underground electrical distribution systems, transformers, metering equipment and troubleshooting electrical infrastructure.

Prior utility or industrial electrical experience is preferred but not required.
